

## **Maddison Hodder, G.I.T.**

### **Chair of Women in Mining Northwestern Ontario**

Maddison graduated from the HBSc. program in Geology at Lakehead University in May 2020 and has been working in the mining and environmental sectors in Northwestern Ontario for nearly a decade. She has a strong background in exploration geology, having worked on a range of field-based projects and as a summer student with local geological consulting companies. In 2025, she transitioned into environmental geology and now works with Stantec in Thunder Bay, where she continues to support responsible resource development and environmental stewardship.

Maddison has been an active member of the Women in Mining Northwestern Ontario board for the past three years and now serves as Chair. Her involvement has included volunteering at Shelter House, supporting the organization and delivery of Mining Day events, and acting as the student liaison, through which she helped bring in over 90 scholarship applicants in 2024. She has also taken on the responsibility of managing the organization's social media platforms and website, helping to foster effective communication with members and promote events through creative and engaging content.

As Chair, she is committed to fostering inclusivity, expanding community engagement, and enhancing professional development opportunities for members. Maddison is excited to continue supporting the growth and impact of Women in Mining and to bring forward fresh perspectives and collaborative energy as a young professional in the industry.
