

Kirsty Liddicoat
WIM Canada Liaison

Kirsty is the General Manager of Evolutions Red Lake Gold Mine in Northwest Ontario. With over 17 years' in the mining industry has seen her career cover mine and project management, mine planning, engineering, geoscience and exploration in coal, gold, iron ore, bauxite and copper-gold. Kirsty's been instrumental in changing the way geoscience is undertaken in coal through the application of new technologies and methodologies.

Having worked in remote and regional areas Kirsty is well accustomed to working with people from a wide variety of backgrounds in demanding conditions. Her dedication to the progression of inclusion and diversity in the industry has developed into a passion for supporting women through their careers.

Kirsty has a Bachelor of Science in Geology (Honors), a Masters in Mining Engineering and a Masters in Business Administration. In 2012 she received the Women in Leadership Australia Scholarship designed to develop high potential female leaders and in 2013 Kirsty was recognized in the inaugural 100 Global most Inspirational Women in Mining published by Women in Mining United Kingdom.

With a track record in team leadership, mine development, mine planning and systems establishment, Kirsty has been instrumental in changing the culture of two major sites in order to improve safety and increase productivity.

Kirsty has a love of the outdoors and all associated activities, has hiked to Everest Base Camp and is known to do anything to get a thrill - not limited to rock climbing and jumping out of planes. She travels extensively and enjoys time with family and friends.
